Innovative Strategies for Accelerated Human Resources Development in South Asia | Asian Development Bank 2017-12-01

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries—Bangladesh, Nepal, and Sri Lanka—with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

Equity in Discourse for Mathematics Education-Beth Herbel-Eisenmann 2011-12-09 This book explores the connection between the ways people speak in mathematics classrooms and their opportunities to learn mathematics. The words spoken, heard, written and read in mathematics curricula. Nevertheless, much valuable work has been done, and continues to be done. This volume reports on some of that work. It provides a glimpse of the state of the art in learning and teaching discrete mathematics around the world, and it makes the case once again that discrete mathematics is indeed mathematics for our time, even more so today in our digital age, and it should be included in the core curricula of all countries for all students.

The Role of Examinations as a Tool for Effective Formative Assessment Practices- Mary-Antoinette DiIuyio 2019 The purpose of this study was to examine the extent to which common examinations are used as a tool for effective formative assessment practices in schools. The Department of Basic Education introduced common examinations in Mathematics Grade 11 with the aim of improving the quality of teaching and learning in schools through moderated assessments and to enhance learner performance. Yet the performance of Grade 11 learners in the mathematics common examinations, since its inception in 2015, has not improved. With reference to five selected schools, the findings in this study showed that formative assessments require an examination and assessment system that will not only adequately measure the capabilities, knowledge and skills of learners, but that will also drive a formative agenda in ensuring the mastering of skills and learner progress to ensure success in summative assessments. It is thus necessary for teachers to be able to make formative assessments more formal by specifying guidelines for where to use them and how to do them and by developing assessments suited for learners’ individual needs (Coetzee, 2012). This study supports the main proposition of constructivism al2200ce constructing, creating, inventing and developing our knowledgeal2200ce it is about thinking and analysing and not memorising informational2200ce it focuses on in-depth-understanding, not regurgitating and repeating backal2200ce+ (Marlowe & Page,2005, pp. 10-11). If common examinations and past examination

question papers are to be used, they need not be used to drill learners on how to answer examination questions. Indeed, these examinations should be used to empower learners on how to answer questions from different perspectives to achieve learning outcomes.

Reviews of National Policies for Education: South Eastern Europe 2003 Volume 2: FYROM, Moldova, Montenegro, Romania, Serbia-OECD 2003-12-02 Educational work is a key element for both human capital formation and the promotion of peace and democratic values. It has therefore been identified as one of the priorities of the Stability Pact. The OECD was asked to be Co-ordinator for “General ...”

Fostering Academic Excellence-J. McLeod 2013-10-22 This book contains a general introduction to the education of academically able students. It provides a solid background of basic knowledge and a survey of research and theory for educational theorists, student teachers, practising teachers, administrators and planners. It offers insights into relevant practical problems as well as guidelines for classroom practice. The significance of this material is outlined for the various levels of the educational system from the individual classroom to the regional planning level. The book is not, however, designed to offer set answers and pat solutions, but to provide rationale for the creative work of teachers and administrators.
